

# IDEATION PHASE

## BRAINSTORM AND IDEA PRIORITIZATION

<b>DATE</b>	20 September 2022
<b>TEAM ID</b>	PNT2022TMID38667
<b>PROJECT NAME</b>	Early Detection of Chronic Kidney Disease using Machine Learning

1. Collected many ideas to overcome the problem statement like cannot be implemented for large datasets, feature selection not applied and more number of features are not included.

2. We came up with the solution to solve the problem like implement for large datasets, apply feature embedding, apply NLP and tune the hyper parameters.

3. At last we decided to implement Feature Embedding Method in our project.
